Meeting Agenda (10/31)

- What have you done since the project started?
- What will you do at the next scrum meeting?
- Blockers?

Meeting Minutes

Michael:
- Since the project started, I implemented update functionality for database items, specifically menu items and inventory items
- Need to add update functionality for recipes by next scrum meeting
- Competition this weekend is my main blocker

Andrew:
- Functionality to add and delete items from manager view
- Create inventory and sales charts and reports
- Schoolwork
- created inventory usage chart

Varsha:
- Started mapping out the GUI for the cashier interface
- Started mapping out the GUI for the customer interface
- Work on functionality logic for the user
- Fix the formatting of the drink options

Anay:
- I have worked on updating the database with each order
- I will have made sure that the database is properly updating the database
- Schoolwork and waiting for the frontend to be functional

Suhas:
- I have started working on the order functionality, and displaying the order details.
- Will add the payment screen.
- Schoolwork/ waiting for order selections to be completed.

Meeting Agenda (11/5)

- What have you done since the last scrum meeting?
- What will you do by the next scrum meeting?
- Blockers?

Meeting Minutes

Michael:
- Since last scrum meeting, I have added recipes to the manager page, albeit very bare bones
- Need to flesh out the recipe section by next scrum meeting
- Time (need to catch up on missed work from the competition last weekend)

Andrew:
- Created inventory usage charts
- Create sales charts and reports
- Schoolwork

Suhas / Anay:
- Payment screens
- Polish up on the orders and payments.
- Schoolwork

Varsha:
- Created the customer/cashier interface
- Work on "adding to cart" logic
- Schoolwork

Meeting Agenda (11/10)

- What have you done since the last scrum meeting?
- What will you do by the end of the sprint?
- Blockers?

Meeting Minutes
